- An experience  
for all your senses!

The zoo school and the natural history house with the zoo café enable adventures independently of every kind of weather, especially to celebrations of our zoological garden. At the end of your trip you can enjoy a small snack in a pleasant atmosphere.

Our zoological garden is worth a visit in all the seasons. Lovely created and nature-orientated enclosures for the animals enable interesting insights in the fascinating wildlife of those animals. If meerkats, cotton-top tamarins, coatis, raccoons, porcupines, dingos or nutrias - everywhere something can be observed. Especially intense is the direct contact with our animals in the walk-in enclosures of the capuchins, white storks, mini goats and kangaroos. You can experience very close contact with the impressive capybaras while they get fed or observe the diversity of our bird species. In addition to our bees house, the chicken house is a special adventure, because chickens can be observed while enclosing. But you also can just relax in our park with a nice view on the swan pond. On your tour through our park you can experience "game elements for opening your senses" like the water swirl or the bird voices simulator or the water playground. In the whole park you can find nice places for sitting and relaxing.
